

Bathroom planning

Tested bathroom plan data for professional planning in 3D programs is only available from ARGE. ARGE has more than 30 years of experience in bathroom planning and is also committed to marketing to specialist tradesmen and planners. In addition, we work on the regular further development of bathroom planning, in particular on the associated data model.

Your benefits as a manufacturer

- Support with data creation, incl. quotation evaluation and support
- Unlimited delivery and testing of data
- Technical data check with check tool
- Visual inspection of the data by the ARGE team
- Direct transfer to planning programmes
- Data transfer to software partners
- Provision of data in the Online Viewer

Our partners

High-quality, verified bathroom planning data requires powerful software. ARGE cooperates with eight professional software houses that implement the data model in practice and regularly provide updates for new user requirements.

Currently, more than 20,000 installers, wholesalers, planners, and architects are creating their plans using a software solution from our partners and the ARGE data.

Totally relaxed – bathroom planning with the ARGE

Everything at a quick glance at any time: At the Internet address www.argebp.com/, installers, planners, bathroom fitters and software companies will find everything they need to know about bathroom planning. All areas are geared to specific target groups with individual content. Bathroom planners can find out about current manufacturers' ranges. Objects are configured in 3D with the Online Viewer.

Bathroom fitters who are new to the subject of bathroom planning will find a quick overview. The ARGE services are described in detail and presented in a comprehensible way. The page is regularly updated and expanded.

ARGE Online Viewer

With the ARGE Online Viewer for bathroom plan data, planners can search for products from brand manufacturers. The Online Viewer enables both a preview and a configuration of the products in 3D. The 3D images generated provide a quick and easy overview of product properties and data to be planned for each individual manufacturer. The ARGE Online Viewer can be called up in the ARGE product data platform at www.building-masterdata.com.
